SUMMARY

Dynamic and innovative **Full-Stack Developer** with a robust **5+ years** track record in engineering scalable, cloud-native solutions. With a **Master's degree in Computer Science** from the University of Maryland, Baltimore County, I excel in **JavaScript, Python, Node.js, and MERN** full stack development. Recognized for leadership in building innovative solutions that address critical societal challenges, enhancing user experience, and boosting efficiency.

PROFESSIONAL EXPERIENCE

❖ Full Stack Developer

Private Energy Partners LLC

June 2024 - Present

- **Engineered 10+ high-performance widgets** for renewable energy tracking, enabling real-time monitoring and optimization of carbon impact.
- **Reduced dashboard load times by 4x** and **cut CPU usage by 50%** through advanced React optimizations, improving efficiency for thousands of data points.
- **Developed an advanced battery configuration system**, enabling precise hourly green energy targets, optimizing energy storage, and reducing grid reliance.
- **Built scalable APIs for energy data processing**, improving data accuracy and security for carbon tracking systems used in sustainability reporting.
- **Led data visualization enhancements**, improving renewable energy insights, empowering clients to make carbon-conscious decisions, and contributing to **CO₂ reduction goals**.
- **Integrated GDPR-compliant user consent management**, ensuring secure energy data handling and reinforcing trust in carbon-tracking solutions.

❖ Graduate Assistant - Artificial Intelligence

University of Maryland-Baltimore County

Aug 2023 - May 2024

- **Led the creation** and launch of a groundbreaking **Artificial Intelligence** course, incorporating cutting-edge technologies, resulting in a **40% boost in student understanding** of complex AI concepts. This mirrors our strategic innovation in developing frameworks for single-page applications and Backend-for-Frontend services, enhancing efficiency and user experience.

❖ Full Stack Developer

Tata Consultancy Services

Jun 2019 - Jul 2022

- **Pioneered a UI/UX overhaul** for the UK Department of Work and Pensions' child maintenance web app, enhancing **service delivery for 846,000 children** and driving significant user experience improvements.
- **As CR lead, I steered a team of 10 developers** to achieve a notable reduction in user interaction time by 8 minutes. I successfully executed complex change requests, earning the **Star of the Month** award in January 2021 for exceptional leadership and project execution.
- Spearheaded a **strategic revamp of the Siebel UI to React.js** for the Department, **delivering £20M** in cost savings through performance enhancements and a **9% reduction in system response time**, showcasing my ability to lead cost-effective and impactful technological upgrades.
- **Collaborated closely with design teams** to implement UX enhancements, incorporating inclusive accessibility features that resulted in a **20% increase in compliance**, reflecting my commitment to creating inclusive and user-friendly digital environments.
- **Championed the professional growth of 30 employees** through a comprehensive 1-month web development training program, focusing on Siebel Open UI, demonstrating my dedication to team development and capacity building.

EDUCATION

- **University of Maryland Baltimore County, United States** Aug 2022 - May 2024
Master of Science in Computer Science | GPA - 3.81/4
- **University of Mumbai, India** Jun 2015 - May 2019
Bachelor's in Engineering in Computer Engineering | GPA - 3.42/4

TECHNICAL SKILLS

- **Front-End Development:** Expertise in React.js, Typescript, Javascript, Spring Boot, Tailwind CSS, Vue.js
- **Back-End Development:** NodeJS; REST API servers, Python FastAPI, React Testing Library, E2E tests
- **Databases:** SQL, PostgreSQL, MongoDB
- **DevOps & Cloud:** Experience with Docker, Kubernetes, Jenkins; familiar with AWS, Azure, GCP
- **Programming Languages:** Python, Java, JavaScript, JQuery

PROJECTS

- **Revolutionary Heart Attack Detection & Prevention with Advanced ML and LIME** Nov 2022
 - Developed a groundbreaking **heart attack detection system**, leveraging advanced machine learning algorithms like RandomForestClassifier, MLPClassifier, and GradientBoostingClassifier with **98% accuracy**.
 - After 3-fold cross-validation, employed LIME for interpretability, unveiling influential factors in predictions, and enabling targeted prevention strategies. Visit: [Heart Attack Detection and Prevention](#) for code.
- **Peer-to-Peer (P2P) File Exchange System with RSA Encryption** Feb 2023 - May 2023
 - Spearheaded the design and development of a **secure P2P file exchange** platform using **Java**, integrating **RSA encryption** to safeguard the confidentiality and integrity of file transfers.
 - Architected a robust system utilizing cutting-edge **OOP principles**, class interfaces, and design patterns; enhanced system scalability by 50% and reduced maintenance costs by 30%.
- **Fraudulent Job Detection Using Machine Learning** Feb 2023 - May 2023
 - Spearheaded a groundbreaking project that transformed job searching and recruitment by implementing strategic sampling methods, visually engaging word cloud visualization techniques, and leveraging the powerful XGBoost algorithm to enhance candidate matching accuracy by 40%.
 - With an unparalleled accuracy of 92%, the project exposes deceptive job postings from 88k records with astounding precision, ensuring the identification of fraudulent ads. Visit [Fake Job Detection](#) for code.
- **Advanced Analytics Dashboard for Real-Time Decision Support** April 2024
 - Developed robust analytics dashboard using **Python FastAPI** and **React**, with advanced authentication for data security. Integrated with **SQL** and **Tailwind CSS** for a **responsive UI**, the platform processed over 10000 data points. Enhanced with real-time insights, **ML predictions** improved response times by 30%, increasing efficiency by **25%**. Visit: [Hostel Management System](#) for code.
- **Cross-Platform Web App for Medical Health Report System** Mar 2019 - May 2019
 - Developed a cross-platform web app using **Angular**, **Node.js**, and **CSS**, centralizing medical records for over 4000 patients. This streamlined healthcare interactions and improved patient care efficiency.

RELEVANT SKILLS AND ACHIEVEMENTS

- Quickly adaptable to new development environments, evidenced by rapid mastery of diverse programming languages and technologies.
- Demonstrated ability to lead projects from concept through deployment, with a keen eye for UI/UX design, aligning with responsibilities of enhancing end-user engagement in Salesforce.
- Collaborative team member with experience in cross-functional project delivery and stakeholder engagement.
